1. The first part of the report
describes the general situation
of the country.

2. The second part of the report
describes the economic situation
of the country.

3. The third part of the report
describes the social situation
of the country.

4. The fourth part of the report
describes the political situation
of the country.

5. The fifth part of the report
describes the cultural situation
of the country.

6. The sixth part of the report
describes the environmental situation
of the country.

7. The seventh part of the report
describes the international situation
of the country.

8. The eighth part of the report
describes the future prospects
of the country.

9. The ninth part of the report
describes the conclusion
of the report.

10. The tenth part of the report
describes the appendix
of the report.

11. The eleventh part of the report
describes the bibliography
of the report.

12. The twelfth part of the report
describes the index
of the report.

13. The thirteenth part of the report
describes the list of figures
of the report.

14. The fourteenth part of the report
describes the list of tables
of the report.

15. The fifteenth part of the report
describes the list of references
of the report.

$$f(x) = \int_0^x \frac{1}{1+t^2} dt$$

21. The twenty-first part of the paper is devoted to the study of the properties of the function $f(x)$ defined by the equation

$$f(x) = \int_0^x \frac{1}{1+t^2} dt$$

1. The first part of the document discusses the importance of maintaining accurate records of all transactions. This is essential for ensuring the integrity of the financial system and for providing a clear audit trail.

2. The second part of the document outlines the various methods used to collect and analyze data. These methods include direct observation, interviews, and the use of statistical models.

3. The third part of the document describes the results of the study. It shows that there is a significant correlation between the variables being studied, and that the findings are consistent across different groups and settings.

4. The fourth part of the document discusses the implications of the findings. It suggests that the results have important implications for policy-making and for the design of future research.

5. The fifth part of the document provides a summary of the key points and conclusions. It emphasizes the need for further research in this area and the importance of continued monitoring and evaluation.

6. The sixth part of the document contains a list of references to the literature cited in the study. These references provide a foundation for the research and show the context in which the study is being conducted.

7. The seventh part of the document includes a list of appendices. These appendices provide additional information that supports the findings of the study and is useful for readers who want to explore the data in more detail.

8. The eighth part of the document is a list of figures and tables. These visual aids help to present the data in a clear and concise manner, making it easier for readers to understand the results.

9. The ninth part of the document is a list of footnotes. These footnotes provide additional information about the study and its findings, and are useful for readers who want to know more about the methodology or the data.

10. The tenth part of the document is a list of acknowledgments. These acknowledgments thank the individuals and organizations that have supported the study and contributed to its success.

1. The first part of the document discusses the importance of maintaining accurate records of all transactions. This includes not only sales and purchases but also the various expenses incurred in the course of business. It is essential that these records be kept up-to-date and organized in a systematic manner.

2. The second part of the document deals with the various methods of accounting. It outlines the different systems that can be used to record and summarize financial data, and discusses the advantages and disadvantages of each.

3. The third part of the document covers the various aspects of financial management. This includes the determination of the company's financial goals, the development of a budget, and the implementation of various financial controls. It also discusses the importance of regular financial statements and the role of the management in ensuring the company's financial health.

4. The fourth part of the document discusses the various methods of raising capital for the company. It outlines the different sources of funds, such as bank loans, bonds, and equity, and discusses the factors that influence the choice of a particular method.

Stark County Ohio Genealogy

This page contains information on the Stark County, Ohio Chapter of the Ohio Genealogical Society

Note: This page is not sponsored by the Stark County Chapter OGS.

The **Stark County Chapter of the Ohio Genealogical Society**, was formed in 1973 to bring together individuals having a common interest in Genealogy in general and Stark County in particular. The Stark Co. Society consists of alot of very friendly folks who are dedicated to increasing the knowledge of genealogy in Stark County. If you have reason to search for ancestors who may have lived in Stark County you need to join this society. The Chapter has assembled alot of useful genealogy resource collections, a result of member research, that is available to the public. The Chapter also publishes a monthly newsletter called the 'Tree Climber' that is included in the modest \$10 per year single membership, \$12.50 joint membership dues. If you plan to join, include an alphabetical list of surnames you're researching and don't forget your ZIP + 4. You can contact the membership chairman Jane Tipton at 416 18th St. NW Canton OH 44703-1328

The Wayne County Genealogical Society

P. O. Box 856, Wooster, OH 44691

The Society was organized in 1964 by several eager people who wanted to collect and publish the basic birth, marriage, burial, and earliest land ownership records of Wayne county. We now have about 142 members still working on more records and answering queries.

The genealogy collection, at the Wayne County Public Library, has some 2820 volumes, 3900 I.G.I. fiche and 661 rolls of microfilm. Staff members will help you by phone at (330) 262-0916 ext. 225.

Meetings

Meetings are held the 1st Saturday of each month, at 2 p.m., except July. All meetings are held at the Wayne County Public Library, Corner N. Market St. & Larwill St., Wooster, Ohio, unless otherwise announced. Ample free parking next to the library.

Newsletter

A newsletter is published quarterly by The Wayne County Genealogical Society. Only one newsletter will be sent to the same address. Queries for the newsletter are welcome and printed free of charge. Any items you may have on Wayne County or its families are requested for publishing in the newsletter including old Bible records. Xerox copies, including title page, are preferred.

The Wayne County Genealogical Society can no longer answer queries that take more than 20 minutes to research. We have decided to follow other societies and offer to do a short search for you for the initial charge of \$5. For this fee, we will check the following:

- 1926 Tax List of Wayne County
- 1850 Census of Wayne County
- 1880 Census of Wayne County
- Probate Court Index 1811-1918
- Douglass' History of Wayne County, 1878
- Wayne County Burial Records
- Wayne County Birth Records, 1867-1908

If you do not need a personal answer, we will print your query in the "Wayne Ancestors" quarterly newsletter we publish. If you do need further research done, please ask for the name of local researchers who can continue your search. For Wayne County Genealogical Society members, these queries will be printed at no charge to you. If you are not a member, please enclose \$1 with your request. Photocopies remain at ten cents per page in addition to the search fee.

So, when writing to us, please enclose either \$1 for simply printing your query (non-members) or \$5 if you want a personal reply. Thank you for understanding the need for this decision. We hope to help anyone interested in their Wayne County roots.

13. Water Chemistry

13.1. Water Chemistry

Water is a polar molecule, with a partial positive charge on the hydrogen atoms and a partial negative charge on the oxygen atom. This polarity gives water many unique properties, including its ability to form hydrogen bonds and its high specific heat capacity.

Water is also a good solvent for many ionic and polar substances. This is because the partial positive charge on the hydrogen atoms can attract the negative ions, and the partial negative charge on the oxygen atom can attract the positive ions.

Water is also a good solvent for many non-polar substances. This is because the hydrogen bonds between water molecules can be disrupted by the non-polar substance, allowing it to dissolve. This is why oil and water can form an emulsion.

Water is also a good solvent for many gases. This is because the hydrogen bonds between water molecules can be disrupted by the gas molecules, allowing them to dissolve. This is why carbon dioxide can dissolve in water to form carbonic acid.

Water is also a good solvent for many organic molecules. This is because the hydrogen bonds between water molecules can be disrupted by the organic molecules, allowing them to dissolve. This is why many organic molecules are soluble in water. Water is also a good solvent for many inorganic molecules. This is because the hydrogen bonds between water molecules can be disrupted by the inorganic molecules, allowing them to dissolve. This is why many inorganic molecules are soluble in water.

Water is also a good solvent for many polymers. This is because the hydrogen bonds between water molecules can be disrupted by the polymer chains, allowing them to dissolve. This is why many polymers are soluble in water. Water is also a good solvent for many colloids. This is because the hydrogen bonds between water molecules can be disrupted by the colloidal particles, allowing them to dissolve. This is why many colloids are soluble in water.

Water is also a good solvent for many minerals. This is because the hydrogen bonds between water molecules can be disrupted by the mineral ions, allowing them to dissolve. This is why many minerals are soluble in water. Water is also a good solvent for many nutrients. This is because the hydrogen bonds between water molecules can be disrupted by the nutrient molecules, allowing them to dissolve. This is why many nutrients are soluble in water.

Introduction

The purpose of this study is to investigate the effects of

the proposed system on the performance of the system.

The study is divided into two parts:

1. The first part is to evaluate the system.

2. The second part is to evaluate the system.

The study is divided into two parts:

1. The first part is to evaluate the system.

The study is divided into two parts:

1. The first part is to evaluate the system.

2. The second part is to evaluate the system.

3. The third part is to evaluate the system.

The study is divided into two parts:

1. The first part is to evaluate the system.

2. The second part is to evaluate the system.

The study is divided into two parts:

1. The first part is to evaluate the system.

2. The second part is to evaluate the system.

Brief History of Wayne Co.

The original Wayne County was established 15 August 1796. This county disappears from Ohio in 1803 when Ohio became a state and ultimately became Wayne County, Michigan.

The present day Wayne County was formed 13 February 1808 and named after Gen. "Mad Anthony" Wayne, who was an outstanding Indian fighter in Ohio. The county seat is Wooster.

On 11 April 1812, the county was divided into four townships; Sugarcreek, Wooster, Mohican, and Prairie. On the 5th of September 1814, East Union and Lake Townships were formed. Four days after Perry's victory on Lake Erie, 14 September 1814, Mohican Township was changed to Perry.

On 15 June 1815, Springfield Township was formed but later disappears as other townships are formed. Chippewa Township was formed 4 September 1815. Baughman, Salt Creek, Chester, and Paint Townships were formed 5 March 1816.

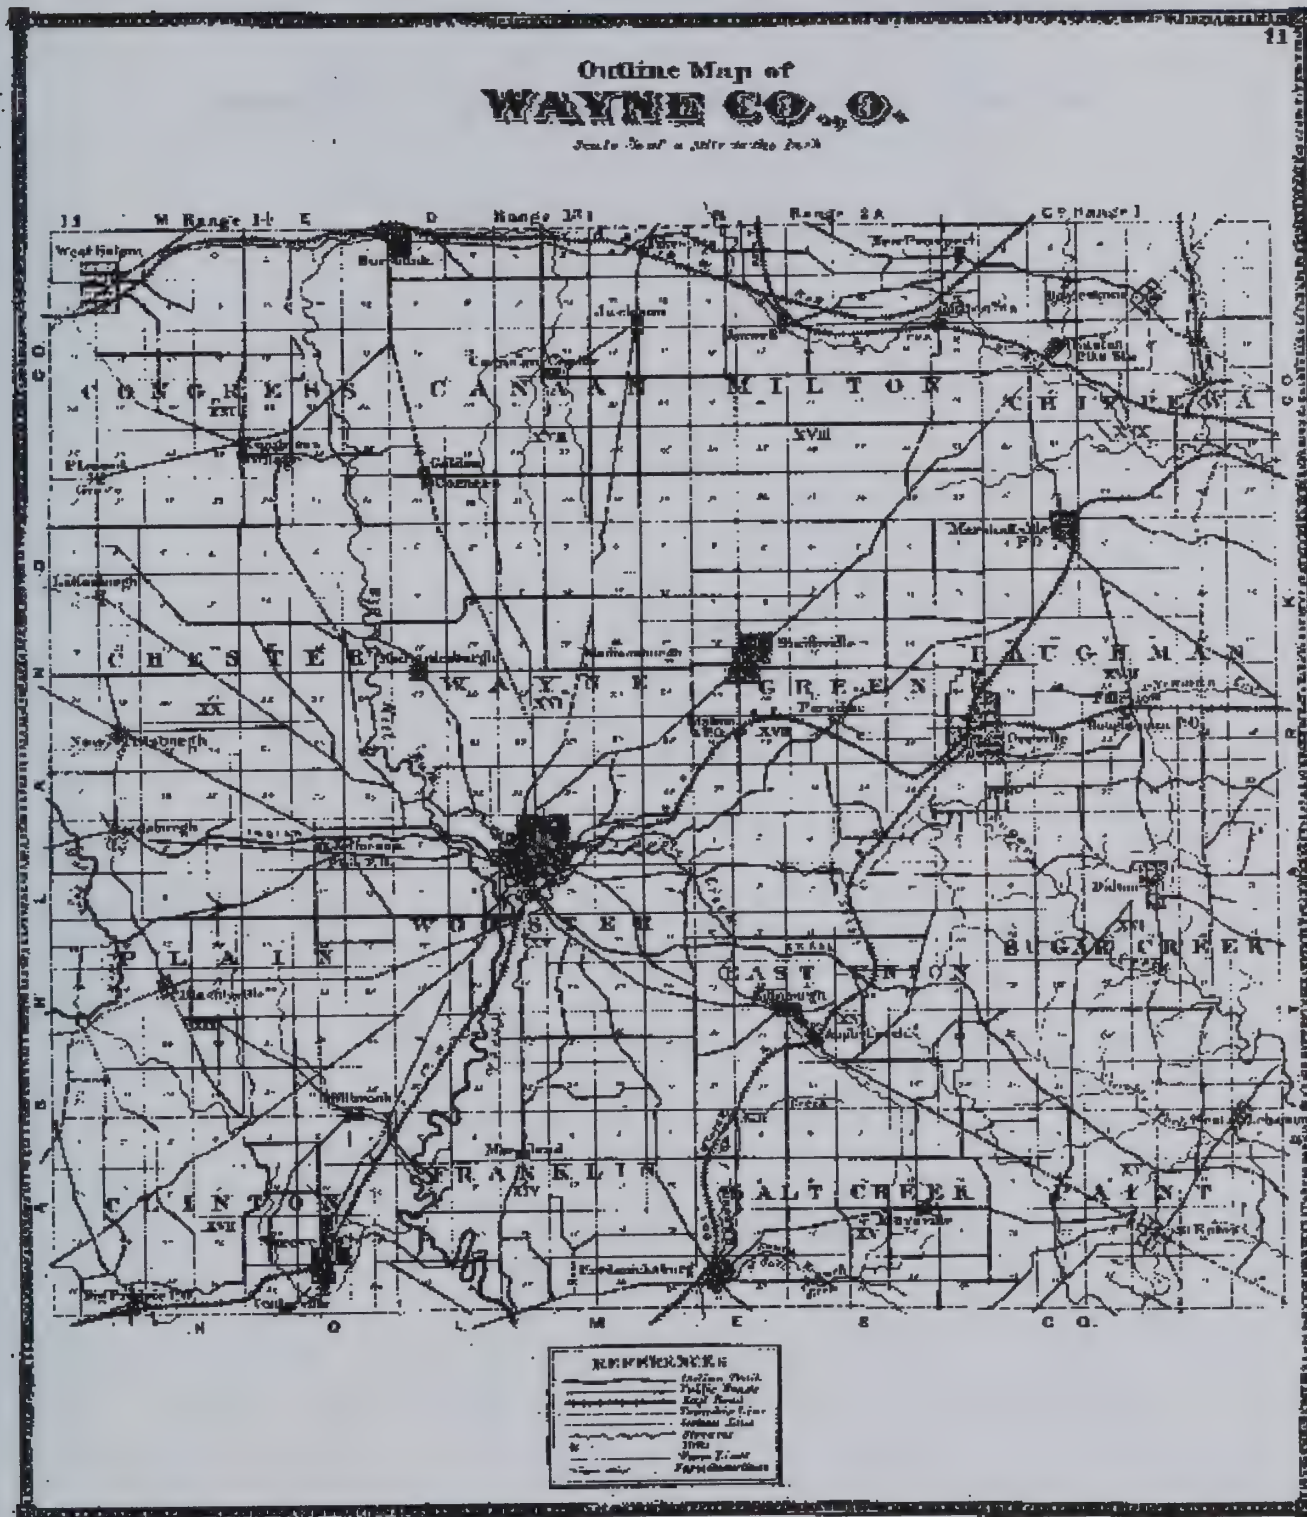

Wayne Township was formed 12 October 1816 with Greene Township following on 5 February 1817; Congress and Milton on 5 October 1818; Jackson Township came into being 1 February 1819 and Canaan 5 May 1819.

With the formation of Plain Township in early 1817, the north half of Springfield Township was wiped out. On 7 June 1820 the township of Franklin was formed. Pike Township was formed in 1817 and was composed of the exact territory which now constitutes Clinton and eradicated the remaining half of Springfield Township. The last of the present day sixteen townships, Clinton, was formed on 7 June 1825.

[Return to Wayne County Co. OH](#)

1. The first part of the document discusses the importance of maintaining accurate records of all transactions and the role of the accounting department in ensuring the integrity of the financial statements.

2. The second part of the document describes the various methods used to collect and analyze data, including the use of statistical software and the importance of sample size and representativeness.

3. The third part of the document discusses the results of the study and the implications for future research, including the need for further investigation into the relationship between the variables studied.

4. The fourth part of the document provides a conclusion and a summary of the findings, highlighting the key points and the overall significance of the study.

Hosts and hostesses on hand to assist visitors

You and your family will enjoy touring...

The Reasin Beall Homestead: Constructed between 1815 and 1817, it is the oldest residence in Wooster and serves as the Society's primary museum building. In addition to Beall family items, it features extensive displays of Victoriana a, glassware, textiles, medical instruments, firearms and toys.

The General Mercantile Store: The Society's most recent addition, reconstruction of this building was completed in 1995 after being moved from the Village of Fredericksburg. It recreates the atmosphere of a turn-of-the-century general store which has now passed from the rural scene.

The Ladies Dress Shop: Vintage fashions at their finest can be found in seasonally changing exhibits in this early 20th-century shop. The Society holds an outstanding collection of early clothing, some pieces dating to the 18th century.

The 1873 Schoolhouse: This one-room school was dismantled at Wooster's south edge and reconstructed on the grounds between 1964 and 1966. With its McGuffy Readers, dunce cap and stool and potbelly stove, it accurately recreates the atmosphere of an old-fashioned learning center.

The Log Cabin: Moved to the grounds in 1963 from its original Congress Township, this hand-hewn structure is authentically furnished with items that tell the story of the early settlers' home life.

The Outdoor Bake Oven: Moved from a farm near Kidron, this structure is typical of the massive outdoor ovens which were found on virtually all German farms in the area during the 19th century, but have now

almost completely disappeared. It is fired on special occasions.

The Kister Building: Among the many diverse exhibits housed here are a huge display of Indian artifacts, early carpenter's shop, blacksmith shop and archaeological-related displays. A carriage team houses horse-drawn conveyances, including locally-manufactured Gerstenslager Co. buggies. The lower level offers displays of early lighting, fire fighting equipment, agricultural tools and stuffed animals, including our unique squirrel band.

The Research Library houses collections of historical books about the settlement of Ohio, Wayne County and Wooster. Genealogical materials include atlases, census, marriage and burial records of Wayne County.

Why not consider joining this friendly, energetic organization dedicated to the preservation of Wayne County's traditional cultural heritage?

1. The first part of the document discusses the importance of maintaining accurate records of all transactions and activities. It emphasizes the need for transparency and accountability in financial reporting.

2. The second part of the document outlines the various methods and techniques used to collect and analyze data. It includes a detailed description of the experimental procedures and the statistical analysis performed.

3. The third part of the document presents the results of the study. It includes a series of tables and graphs that illustrate the findings of the research.

4. The fourth part of the document discusses the implications of the findings and provides recommendations for future research. It also includes a conclusion that summarizes the main points of the study.

Appendix A: Data Collection Methods

Method	Description
Interviews	Semi-structured interviews with participants to gather qualitative data.
Surveys	Questionnaires distributed to participants to collect quantitative data.
Observations	Direct observation of participants in their natural environment.
Focus Groups	Group discussions with participants to explore specific topics in depth.
Archival Data	Analysis of existing records and documents to provide context.

Franklin County (population 121,000) was created on September 9, 1784, from part of Cumberland County and named for Benjamin Franklin. Chambersburg, the county seat was founded in 1764 by Benjamin Chambers, for whom it was named.

1. The first step in the process is to identify the problem or issue that needs to be addressed. This involves gathering information and understanding the context of the situation.

2. Analysis

2. Once the problem is identified, the next step is to analyze the situation. This involves breaking down the problem into smaller, more manageable components and identifying the underlying causes.

3. The third step is to develop a plan of action. This involves determining the steps that need to be taken to address the problem and identifying the resources required.

4. The fourth step is to implement the plan. This involves putting the plan into action and monitoring progress to ensure that the problem is being addressed effectively.

5. The final step is to evaluate the results. This involves assessing the outcomes of the plan and determining whether the problem has been successfully resolved.

6. The process is then repeated as needed to address any remaining issues or to improve the effectiveness of the plan.

7. The process is a continuous cycle that allows for ongoing improvement and adaptation to changing circumstances.

8. The process is a key component of effective management and leadership.

9. The process is a fundamental part of the organizational culture.

10. The process is a critical tool for achieving organizational success.

11. The process is a vital part of the organizational strategy.

12. The process is a key element of the organizational framework.

13. The process is a central part of the organizational mission.

14. The process is a core part of the organizational values.

15. The process is a fundamental part of the organizational identity.

16. The process is a key part of the organizational reputation.

17. The process is a vital part of the organizational legacy.

Welcome to Franklin County, a part of the beautiful Cumberland Valley, located in Southcentral Pennsylvania, with easy access from major highways. The Cumberland Valley region stretches from Carlisle, Pennsylvania to Winchester, Virginia. There's something for everyone: fairs, festivals and lots of fun, unique antique shops and specialty shops, historic areas, golfing, hunting, fishing, skiing, professional theaters and more.

Franklin County is also Civil War Country. It sustained more military activity during the Civil War than any comparable area in the North. Because of its strategic location in the heart of the Cumberland Valley, the area was the target of three major Confederate cavalry raids: Stuart 1862, Jenkin 1863, and McCausland 1864, as well as one full-scale invasion, the Gettysburg Campaign of 1863. These events incurred severe destruction and economic hardship on the population. The final visitation by McCausland's cavalry left the county seat, Chambersburg, a smoldering ruin, the only northern town burned by regular Confederate forces during the war. At least 19 separate military engagements, most of them skirmishes, occurred in the county. This is more than any other county in the north. More than 150,000 soldiers from both sides camped at various locations in the area.

Because of all this rich heritage, Franklin County can truly be called "Civil War Country."

My First Success Story

Many times the beginning of any part of a genealogist's research will start with a family story. My search for a Union Civil War veteran began with my third great-grandfather, [Xerxes Knox](#). I had a copy of a letter, written by his youngest son in 1963, to my grandmother. In it he stated simply that his father was a Civil War veteran, along with the date of birth and date of death for his father. Not much to go on, but then I hadn't yet found out about the wonderful treasure-trove of information that was waiting for me in a musty-old file in Washington, DC. On a visit to the National Archives branch in Seattle, I had spent the entire day searching for various ancestors and had no luck locating anyone in any of the places they were supposed to be. I had a half-hour to kill before closing and thought I would explore the back room. There was a tall filing cabinet filled with rolls of microfilm called the *General Index to Pension Files, 1866 to 1934*. The boxes were labeled as to which surnames of the alphabet were contained on each roll. I pulled out the box which would contain Knox and went back to the microfilm reader to see what was contained on the film. Of course, I had a lot of luck in the fact that I was working with a bit of an uncommon name like Xerxes Knox. In a matter of a few minutes I found the index card on the roll that listed his name, the unit and state that he served with during the war, his wife's name, his application number and his pension number! I couldn't believe that in the last half-hour of my day I had more luck finding information than I had in the previous seven-and-a-half hours of diligent, serious research. (Since then on all the other trips I have made to the archives, I have found that the last half-hour is, in fact, always a magical time of day. The most interesting facts and bits of information always find a way of popping up at the last minute, which in turn forces me to go back to the archives as soon as I can.) I obtained the order form I needed from the volunteer and sent it to the National Archives in Washington, DC right away. Eight weeks and

There is a large number of people who are
interested in the history of the country.

History

History is the study of the past.

It is a branch of knowledge that deals with the events and actions of the past.

Importance of History

History is important because it helps us to understand the world around us. It shows us how things have changed over time and why. It also helps us to learn from the mistakes of the past and to make better decisions in the future.

History is a subject that is often misunderstood. Many people think of it as a collection of facts and dates. However, history is much more than that. It is a way of thinking about the world. It is a way of understanding the human experience. History is a subject that is essential for a well-rounded education. It is a subject that is relevant to our lives today. History is a subject that is full of interest and excitement. It is a subject that is worth studying and learning about.

US\$10 later I had the first set of copies of Xerxes' pension papers. I have learned more about this man from these papers than I ever would have learned had I known him personally. In fact, he may have been a bit disconcerted if he were aware of what sorts of information his third-great granddaughter knew regarding his health and his anatomy! Regardless of this, the information on Xerxes was priceless and by the end of the whole research process into his Civil War service, I felt that I was very close to him. That summer I repeated the whole wonderful story to my great-aunt who hadn't known about Xerxes. When she proudly brought out a picture to share with me I cried and screamed to my husband, "Mark, it's him! It's him!". The picture was a four-generation photo of Xerxes, his daughter Nellie, her daughter Clara and her daughter, my grandmother, LaVern. Having a picture of my grandmother, who I had known and loved dearly, in the same photo with Xerxes, was quite unbelievable to me. At this moment that picture hangs proudly over my computer and I still am a bit amazed when I look at it. I hope that in following this line of research, you have as much success in your initial ventures as I did with mine.

A. The General Index to Pension Files, 1861-1934. T288

1. The first place to start is on the General Index to Pensions at the National Archives. This index is on microfilm and the rolls are available at the [National Archives regional branches](#), through NARA's [Microfilm Rental Program](#) and also through your local [LDS Family History Centers](#). If your ancestor fought for the Union and lived through the war, more than likely he would have applied for a pension. If he died during the war, many times his widow or even his children would have applied for his pension. I have had luck under both those circumstances. If your ancestor fought for the South, the individual southern states provided pensions. I haven't done any research on these, so I can't advise on Confederate pensions or service records. See [links to related web sites](#) at the bottom of this page for help with these types of records.
2. The Index is arranged alphabetically and is contained on dozens of rolls of microfilm. You will need to order the film which would contain your ancestor's surname. The National Archives has a list of the microfilm roll numbers online at <http://www.nara.gov/publications/microfilm/military/mil22.txt>. Scroll down the list approximately one-third of the way or use your browser's "Find" feature to locate the section for the General Index to Pension Files, 1861-1934. T288. Determine which roll of microfilm contains your ancestor's surname, then rent a copy of this film via your local FHC or through the National Archives as mentioned in the paragraph above. The films contain pictures of index cards that list the name of the soldier and the unit, regiment, and state which he served with. Also listed are the application number, the certificate number and if a widow or child also applied, their names will appear on the card as well. Make a copy of all the information contained on this index card.
3. Using the information from the index card you can now order copies of the veteran's military records as well as their pension records directly from the National Archives in Washington, DC. There is more information contained on the pension papers that is useful for genealogy than the information that you will find contained in the military records. The military records will generally contain copies of the muster roll cards for the military unit, enlistment papers, a physical description of the soldier and in some cases they also contained discharge papers. It is not necessary to order copies of the military records in order to obtain genealogical information, because the pension papers will have most of what you need. However, I ordered the military papers to satisfy my own curiosity and really enjoy having them.

B. NATF Form 80, Veteran's Records (Before WW1 only)

The first part of the report is a general
description of the project. It is a
study of the effect of the new
method of teaching on the
learning of the subject. The
method is a new one and it is
the purpose of the study to
determine whether it is better
than the old one. The study
is being conducted in a school
where the new method is being
used. The results of the study
will be reported in the second
part of the report.

1. General Description of the Project

The project is a study of the effect of the new
method of teaching on the learning of the subject.
The method is a new one and it is the purpose of
the study to determine whether it is better than
the old one. The study is being conducted in a
school where the new method is being used. The
results of the study will be reported in the second
part of the report.

The study is being conducted in a school where
the new method is being used. The results of the
study will be reported in the second part of the
report.

The results of the study will be reported in the
second part of the report. The study is being
conducted in a school where the new method is
being used. The results of the study will be
reported in the second part of the report.

The results of the study will be reported in the
second part of the report. The study is being
conducted in a school where the new method is
being used. The results of the study will be
reported in the second part of the report.

1. If you are lucky enough to find your ancestor on the pension index and have recorded the appropriate information, you can send to the National Archives for copies of the military and pension papers. You will need two copies of NATF Form 80 - one for the military records and one for the pension papers. The various branches of the National Archives have these forms on hand. You can now also order these forms by e-mail. Send a message to inquire@arch2.nara.gov, requesting the forms and be sure to give them your postal mailing address.
2. At the top of the form, check the box for the pension file. Currently, the charge for copies is US\$10.00. If you check the credit card box and supply them with your card number, they will charge your card and send you the copies. Otherwise, they locate the file, send you back a request for payment and then send the file after receiving your payment. That adds several weeks to the waiting. It generally takes about 8 to 10 weeks to get the copies back from the National Archives. They copy what they consider to be the most pertinent parts of the file - usually 20 or 30 pages. If there are more pages in the file to be copied, they will send you a notice as to how much more it will cost. I highly recommend that you spend the extra money and get a complete copy of the pension file. Several times now I have found little jewels of information hiding in the last few pages of a pension file. Be sure to fill out the rest of the form as completely as possible. The most important facts being the name of the veteran, the state and unit which he served with and the application and pension number.
3. You can also send another form in to request copies of the military file. The charges are the same. As stated above, they usually only contain about a dozen pages and show the muster roll cards of when the soldier was present with the regiment or absent in the hospital, etc. They also have a physical description of the soldier, although a lot of times the pension file has that too. Some of the military files that I have received also had the documents that the soldier signed when they volunteered for service.
4. Keep the pink copies of the form for your files. I generally write the date I am mailing the forms on the top of my copy to keep track of when I mailed them. Send the completed forms to:

National Archives Records Administration
General Reference branch (NNRG-P)
7th and Pennsylvania Avenue, NW
Washington, DC 20408

C. The Waiting Can Be Bearable - If You Use Your Time Wisely!

1. After you have filled out the forms and are patiently waiting for the packages to come to you in the mail, you should explore other resources at hand. Now that you know what state your ancestor served from, you can check to see if there are any books at your local library regarding the soldiers who served from that state. Quite often there were regimental histories or State Adjutant General's Reports written which may detail the areas that your soldier fought in, what battles they participated in, etc.
2. Another resource is known as the "[OR](#)" or "[Official Record](#)". The full title is *The Official Record of the Union and Confederate Armies in the War of the Rebellion*. This reference contains over one-hundred and twenty volumes and can usually be found in many of the larger libraries. Check to see if the library you use has a set. These volumes are also available on [CD-ROM](#). These books mostly contain copies of correspondence between high ranking officials and officers that

participated in the Civil War. However, if you use the index and look up the unit that your ancestor served in, you may find references to battles and engagements that give details about that unit's participation. In the example of my third great-grandfather, Xerxes Knox, there were many references regarding his unit's involvement in Arkansas. The details we learned using the "OR" explained why Xerxes was in Arkansas at the time of his capture by the Confederate Army.

3. Another resource is the state which your ancestor served from. Check to see if there any records kept by the state regarding Civil War veterans. Write to the local historical or genealogical societies to see if they can supply you with names of people or organizations to contact.
4. The following are web pages which list e-mail addresses for people who have done research or who are involved in historical study regarding specific military units which participated in the Civil War. Check these lists to see if there is a person involved in the study of the unit you are interested in:
 - [Civil War Units File - USA National and States A - I](#)
 - [Civil War Units File - USA States K - N](#)
 - [Civil War Units File - USA States O - W](#)
 - [Civil War Units File - CSA National and States A - M](#)
 - [Civil War Units File - CSA States N - V](#)

D. The Fruits of Your Research

I have 7 Civil War vets in my family and I have ordered the pension and military papers for all of them. Here is some of the information I have gotten from these papers: state marriage records, lists of children and their births, lists of siblings, birth/death dates and places for the soldier, his wife and sometimes their parents. In the case of a pension, most soldiers were claiming some sort of disability. Most seem to have claimed severe rheumatism from the cold and damp weather conditions. Because of this, there are pages and pages of doctors examinations. Also affidavits signed by neighbors and fellow soldiers attesting to the disability. Many times the neighbors in my papers turned out to be brothers, in-laws, cousins, etc. I even had a copy of a letter written by a granddaughter. In it, she was asking about the records for that soldier and also wanted to know about 4 other soldiers in the family. They turned out to be people I hadn't known had served in the military - one during the Mexican-American war and one during the War of 1812. It was a wonderful find! One of my vets died right after enlistment and left 8 children by his first wife and 7 more by his second wife. The second wife and children applied for the pension. This packet was by far the most informational, because they had to prove that they were his wife and children, etc. The papers were full of birthdates, places, affidavits, etc. So for the genealogical researcher, the amount of information in a pension file of this type is much more plentiful.

I might also suggest a book that has been very helpful to me. It is a paperback titled: [Tracing Your Civil War Ancestor](#) by Bertram Hawthorne Groene, ISBN 0-345-36192-X, about US\$6.95.

How To Order Military & Pension Records for Union Civil War Veterans from the National Archives
This page created and maintained by Cyndi Howells, cyndihow@oz.net
Updated September 8, 1999

Copyright © 1996 - 1999 by Cyndi Howells. All rights reserved.

1. The first part of the paper is devoted to the study of the properties of the function $f(x)$ defined by the equation

$$f(x) = \int_0^x \frac{1}{1+t^2} dt$$

It is shown that the function $f(x)$ is continuous and differentiable on the interval $(-\infty, \infty)$. The derivative of the function is given by the formula

$$f'(x) = \frac{1}{1+x^2}$$

It is also shown that the function $f(x)$ is bounded on the interval $(-\infty, \infty)$.

The second part of the paper is devoted to the study of the properties of the function $g(x)$ defined by the equation

$$g(x) = \int_0^x \frac{1}{1+t^2} dt$$

It is shown that the function $g(x)$ is continuous and differentiable on the interval $(-\infty, \infty)$. The derivative of the function is given by the formula

$$g'(x) = \frac{1}{1+x^2}$$

It is also shown that the function $g(x)$ is bounded on the interval $(-\infty, \infty)$.

$$f(x) = \int_0^x \frac{1}{1+t^2} dt$$

The third part of the paper is devoted to the study of the properties of the function $h(x)$ defined by the equation

$$h(x) = \int_0^x \frac{1}{1+t^2} dt$$

Early American Roads and Trails

with descriptions of 16 of the major early roads

RoadTrails

Beverly Whitaker, CGRS
your Genealogy Tutor,
is located in Kansas City, Missouri.

Because we live in the area where major trails to the Far West began, I became fascinated with the subject of early American travel. Moreover, my genealogical studies and research show me how important it is to try to determine the migration trails of our ancestors.

That's what led to this site! Here, I've provided [descriptive paragraphs](#) of 16 of the major early American roads and trails. At the end of this page, I list additional sources of information.

The images used herein were obtained from Mindscape's PrintMaster

Early American Books and Tracts

of the major early period

Foundations

The early American book trade
from 1600 to 1800
is located in Kansas City, Missouri.

~Introduction~

Expansion by Americans from the Atlantic to the Pacific took many years, often spanning several generations. During the colonial years, travel was largely North > South. Following the Revolutionary War, citizens of the new nation began to forge westward and were often joined by newly arriving immigrants. Expansion occurred by different paths and a variety of transport means. Among the trails and roads of special interest to genealogists and historians are the sixteen described here in capsule form.

~Additional Resources~

The brief sketches on this page are based on information contained in the author's set of [reference cards](#), *"American Trails and Roads Reference Cards."* I also prepared [audiotapes](#) for a number of the trails and roads, along with one titled, *"Leaving Home: Reasons for Migration."* Recently available are a number of [program kits](#) which genealogical and historical societies are using to present programs at their meetings about some of the most significant migration routes in pioneer America.

I'm not acquainted with trails of a more local nature; so I encourage you to check those out with a historical society in that geographical area. Or you might send a paragraph to the **"RoadTrails in America MAIL LIST."** Join free, using the [subscription form](#) on this page. Read [archived messages](#) and then begin submitting your own.

I think you will find it enjoyable and informative to study old maps. Notice how often today's federal highways and Interstates follow close to the old roads. Pay attention to geographical formations such as rivers and mountain ranges. A pioneer journey was difficult enough without choosing a rugged path! Remember also that much travel was by river or a combination of river, wagon, packhorse, and walking!

~How to Cite References~

If you include any of the information here in your own compiled genealogy or history sketches, you should cite as your reference: *"American Trails and Roads Reference Cards, Kansas City, Missouri: Genealogy Tutor, Beverly Whitaker, 1995."*

~A Bibliography Is Available~

Students frequently ask for a bibliography. I've compiled a list of the resources I used as I prepared this webpage. Certainly there are many more books to study, and I would be happy to receive your recommendations. You are invited to visit my [BIBLIOGRAPHY web page](#) to review the titles I used to begin my study on the subject of early American roads and trails. An additional list of excellent resources has been provided by [R. Lee Hadden, Reference Librarian, US Geological Survey Library.](#)

~Join the RoadTrails Mail List~

This page has generated so much comment and queries that on May 1, 1999, I set up the **"RoadTrails in America MAIL LIST"** for your participation. By joining this free Mail List, you can offer your comments and ask questions in a forum of interested parties who can share their widespread knowledge. The **"RoadTrails in America MAIL LIST"** will replace most individual e-mail correspondence with me since I will participate actively in the mail list itself.

The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that proper record-keeping is essential for the transparency and accountability of the organization. The text also mentions the need for regular audits to ensure that all financial data is correctly recorded and reported.

In the second part, the document outlines the procedures for handling financial data. It details the steps involved in collecting, processing, and analyzing financial information. The text also discusses the importance of data security and the measures that should be taken to protect sensitive financial data from unauthorized access.

The third part of the document focuses on the reporting requirements. It describes the format and content of the financial reports that must be submitted to the relevant authorities. The text also discusses the importance of providing timely and accurate information to stakeholders and the consequences of non-compliance with reporting requirements.

The final part of the document provides a summary of the key points discussed. It reiterates the importance of maintaining accurate records, following proper procedures, and meeting reporting requirements. The text also offers some final thoughts on the overall goal of ensuring the financial integrity and transparency of the organization.

THE BOSTON POST ROAD

A crude riding trail was created in 1673 to carry mail from New York to Boston. It became known as the Boston Post Road. The first postrider's round trip, a journey of over 250 miles, took four weeks, following the Upper Northern Route. The Middle Route was a bit shorter, the Southern Route a bit longer. All went from Boston to New York City. The first stagecoach in service (1772) made the trip in just one week. During the Revolutionary War, the King's Highway (which included the Boston Post Road) became the mustering point for several of the Revolutionary War battles, including the final battle at Yorktown. The Post Roads were used for maneuvering soldiers and equipment. Stagecoach service and the mail took second place. Following the War, the Post Roads became important links between the states of the new nation and sections were improved.

BRADDOCK'S ROAD

The predecessor of this military road was called Nemaolin's Path, named for the Delaware Indian who assisted Colonel Thomas Cresap in blazing a path from Cumberland, Maryland to a trading post of the Ohio Company of Virginia at present-day Brownsville, Pennsylvania. Soon after Virginia's governor sent

Major George Washington in that direction to expel the French from British territory. To accommodate his supply wagons, it was necessary to widen the trail, and that portion became known as Washington's Road. Washington went with Britain's Major General Edward Braddock during the French and Indian War. A company of 600 soldiers set out from Ft. Cumberland to widen Washington's old road through Maryland, past the ruins of Fort Necessity on into western Pennsylvania, moving toward the French stronghold at the Forks of the Ohio, site of present-day Pittsburgh. Braddock's road was the first road to cross overland through the Appalachian Mountains. He insisted that the road be 12 feet wide so that horse-drawn wagons could travel on it to haul the necessary supplies for his advancing army. As the years advanced, Braddock's Road became impassable. Pioneers who trekked into western Pennsylvania usually preferred to depend on packhorse trails, traveling in caravans. When construction began on the new Cumberland Road, it roughly followed this old road. The Cumberland Road and its extension West became known as the National Road and now U.S. Highway 40.

[Return to List of Roads and Trails](#)

CALIFORNIA TRAIL

Following the discovery of gold in California, President James Polk's Message to Congress on December 5, 1848, set off a raging epidemic of gold fever. 40,000 gold seekers came to California by sea. An almost equal number came overland on the California-Oregon Trail, making the 2000-mile journey by covered wagon, horseback, or on foot. Around 10,000 came by the Santa Fe Trail into southern California. The most frequently traveled overland route to the gold fields was the one that followed the Oregon Trail from the Missouri River to the Rocky Mountains, and from there down the California Trail to Sutter's Fort. St. Joseph, Independence, Council Bluffs, and other frontier towns were jumping-off points to start this main trail overland to California. The trail coincided with the Oregon Trail until it crossed the Rockies. Then, some went north of the Great Salt Lake, others south, before coming together at the Humboldt River. Gold-seekers heading for California included city people who were inexperienced with outdoor life. Many were without experience at handling mules or oxen; they couldn't fix wagons; they didn't know how to hunt. They didn't anticipate the dangers of the trail and relied too heavily on guidebooks which were frequently misleading. Those who failed to join companies with experienced outdoorsmen ran great risk of being stranded or lost in the wilderness. Nevertheless, many preferred to travel on their own. Some rode horses or mules, used ox-drawn wagons, or walked.

THE FALL LINE ROAD

The Fall Line Road ran parallel to and between the King's Highway and the Upper Road. The road broke off from the King's Highway at the town of Fredericksburg, Virginia. By 1735, it carried traffic into the interior of Virginia and the Carolina and across into Georgia. The road followed the fall line, a geographical feature caused by erosion, a separation line stretching from Maryland all the way to Georgia, running between the river tidelands and inland elevations on the Atlantic coast--it defines an east and west division between the upper and lower elevations. Persons traveling from Pennsylvania to Maryland to the inland areas of Carolina before 1750 probably followed this road because it was an easier road to travel than the Piedmont road (called the Upper Road). The road was of particular importance to the Carolinas because it connected them to their neighbors. North Carolina's local laws called for building roads only "to the nearest landing," which created a haphazard system of major roadways which led only to water routes. The result had been that although the major towns in North Carolina soon had roads, they didn't lead to each other! The road saw heavy use during the Civil War and afterwards, and was gradually improved.

THE GREAT WAGON ROAD including THE GREAT VALLEY ROAD

Hordes of early German and Scotch-Irish settlers used what became known as the Great Wagon Road to move from Pennsylvania southward through the Shenandoah Valley through Virginia and the Carolinas to Georgia, a distance of about 800 miles. Beginning first as a buffalo trail, a great Indian Road (the Great Warrior Path) ran north and south through the Shenandoah Valley, extending from New York to the Carolinas. The mountain ranges to the West of the Valley are the Alleghenies, and the ones to the east constitute the Blue Ridge chain. The Second Treaty of Albany (1722) guaranteed use of the valley trail to the Indians. At Salisbury, North Carolina, the Great Warrior Path was joined by the Indian's "Great Trading Path." By the early 1740s, a road beginning in Philadelphia (sometimes referred to as the Lancaster Pike) connected the Pennsylvania communities of Lancaster, York, and Gettysburg. The road then continued on to Chambersburg and Greencastle and southward to Winchester. In 1744, the Indians agreed to relinquish the Valley route. Both German and Scotch-Irish immigrants had already been following the route into Virginia and on to South Carolina, and Georgia. After 1750 the Piedmont areas of North Carolina and Georgia attracted new settlers. From Winchester to Roanoke the Great Wagon Road and the Great Valley Road were the same road, but at Roanoke, the Wagon Road went through the Staunton Gap and on south to North Carolina and beyond whereas the Valley Pike continued southwest to the Long Island of the Holston, now Kingsport. The Boone Trail from the Shallow Ford of the Yadkin joined the road at the Long Island of the Holston.

[Return to List of Roads and Trails](#)

THE KING'S HIGHWAY

From Boston to Charleston on the King's Highway was about 1300 miles. It was possible to travel this road by wagon, averaging about 20-25 miles per day. A traveler making the entire journey would have taken at least two months. Conestoga freight wagons, drawn by four to six sturdy horses, were especially designed for mud with iron-rimmed wheels nearly a foot wide. The road's origins are traced to the old Delaware Indian trail (across Jersey) which Peter Stuyvesant used to force out the Swedes in 1651. Then in 1673, in response to King Charles' wish that communication be established between his colonies, the first crude riding trail was created for mail service between Boston and New York. Named the "Boston Post Road," it eventually expanded into "the King's Highway." By 1750, a continuous road existed for stagecoach or wagon traffic from Boston to Charleston, linking all thirteen colonies, but the road was a difficult one to travel. During the Revolutionary War, the King's Highway as a link between the colonies helped them to coordinate their war efforts. However, the name was looked upon with such disfavor by American patriots that many began once again to use the name "Boston Post Road."

[Return to List of Roads and Trails](#)

THE MOHAWK (IROQUOIS) TRAIL

The Mohawk Trail of New York, also known as the Iroquois Trail, extended from Albany west to the eastern end of Lake Erie, where Buffalo is now located. This was the most northerly route through the Appalachian Mountains, leading from New York's Hudson Valley along the Mohawk River on to the Great Lakes. It was used heavily by New York's early emigrants and was much involved with the state's early history. Today's maps show the travel route as the New York Thruway (I-90) from Albany west. From about 1680 the French-Iroquois Country was a major stronghold. A wagon trail reached from Albany to Lake Erie after the French and Indian War and became a part of the route followed by Loyalists into Upper Canada, later to become Ontario. The Mohawk Turnpike opened as far as Utica by 1793. In the 1820s this route became that of the Erie Canal, and in 1845 it became the route of the New York Central Railroad.

●

[Return to List of Roads and Trails](#)

THE MORMON TRAIL

The Mormon Trail stretched nearly 1,400 miles across prairies, sagebrush flats, and steep mountains. Each had its challenges for the early wagon trains and the later handcarts. The Mormon Trail originated in Nauvoo, Illinois, and extended westward to Utah where they established Salt Lake City. In 1845, to allay violence and night-riding, Brigham Young and the Twelve agreed to leave Illinois "as soon as grass grows and water runs." From Nauvoo, the Saints crossed Iowa. Their first real way-station was at Garden Grove, where 170 men cleared 715 acres in three weeks, for the purpose of providing shelter for those coming behind. In 1846, they crossed the Missouri River at Council Bluffs, setting up Winter Quarters on Indian lands, at what is now an Omaha suburb. While 3,483 Saints waited there for spring, more than 600 perished. As spring 1847 approached, approximately 10,000 Mormons were encamped along the trail in Iowa and at Winter Quarters. Brigham Young and the Council of the Twelve organized the Pioneer Company to go ahead to mark the trail and lay the cornerstone of the new Zion. The first group of Mormons passed through Echo Canyon, over Big Mountain and Little Mountain and down Emigration Canyon, coming into full view of the Great Salt Lake Valley on July 24, 1847. During the period from 1846 to 1869, about 60,000 Mormon pioneers crossed the prairies. They came from existing American states and also from many European countries.

[Return to List of Roads and Trails](#)

THE NATCHEZ TRACE

The Natchez Trace has a colorful history. By 1785, there were traders from the Ohio River Valley (called "Kaintucks") arriving in Natchez with flatboats and rafts filled with products and crops. But of course it wasn't possible to return upriver against the currents. Instead, they would walk or ride horses northward on the Trace to their homes. Often they were attacked and robbed of the riches so recently gained. The Trace gained the nickname "Devil's Backbone." You might be able to locate the book which relates to that name. It is by Jonathan Daniels, "The Devil's Backbone, the Story of the Natchez Trace." The U.S. never owned the public lands of Tennessee through which about 100 miles of the Trace ran. In Alabama, it went only 40 miles, touching only two counties. 300 miles of it lay in Mississippi. The coming of steamboat traffic spelled the end of the dominance of the Natchez Trace. Andrew Jackson made a lot of trips up and down the Trace. In 1813 when he walked it with his army, he acquired the name "Old Hickory" because his volunteers considered him as tough as the hickory trees around them. Another significant name connected to the Trace is that of Meriwether Lewis of the Lewis and Clark Expedition. The question still lingers--was his death on the Trace suicide or murder?

[Return to List of Roads and Trails](#)

THE NATIONAL ROAD

The National Road was originally called the Cumberland Road because it started in Cumberland, Maryland. By 1825, it was referred to as the National Road because of its federal funding. The enabling act for admission of Ohio to the Union in 1803 contained provisions for construction of a road linking the East and West. Congress then passed "An Act to Regulate the Laying Out and Making a Road from Cumberland, in the State of Maryland, to the State of Ohio." In 1811, contracts were signed for construction of the first ten miles west of Cumberland. The road reached Wheeling in 1818. It entered Columbus in 1833, and Congress made its last appropriation for the road in 1838. During the 1830s, Congress had begun to turn the road over to the states for administration and maintenance. Construction was suspended in the early 1840s because of lack of congressional appropriations. Indiana completed its intrastate segment in 1850. The road then continued on to Vandalia, Illinois, but it did not continue on to

Jefferson City, Missouri, as had been planned, the idea being that the road was to go through state capitals as it moved westward. The old National Road became part of U.S. 40 in 1926.

[Return to List of Roads and Trails](#)

THE OREGON TRAIL

The Oregon Trail extended from the Missouri River to the Willamette River. It was used by nearly 400,000 people. The trail's starting points were Independence, Westport, St. Joseph, and Ft. Leavenworth. Alternate routes included Sublette's Cutoff and the Lander Cutoff. After 1846, there was also a choice at The Dalles between rafting down the Columbia River or taking the new Barlow Road across the Cascades. Each part of the journey had its set of unique difficulties. During the first third of the journey, emigrants got used to the routine and work of travel. Approaching the steep ascent to the Continental Divide, water, fuel, grass for the livestock, fresh meat, and food staples became scarce. The final third was the most difficult part of the trail. The major fears of the pioneers following the trail were Indians, disease, and the weather.

[Return to List of Roads and Trails](#)

THE PENNSYLVANIA ROAD

The Great Conestoga Road, completed in 1741, and the later Lancaster Pike (opened in 1794) went from Philadelphia to Lancaster. After the Lancaster Pike was completed, the Pennsylvania Legislature granted charters to extend it westward to Pittsburgh, following closely the route of the Forbes Road. Faced with the need to build a road to move troops during the French and Indian War, General Forbes' troops constructed a road from Harrisburg to Ft. Duquesne which he renamed Fort Pitt, after his commanding general. Today, we know it as Pittsburgh. Years later, the Pennsylvania Legislature granted charters that extended the Lancaster Pike on westward to Pittsburgh, subsidizing this "Pennsylvania Road" by subscribing to stock in some of the companies. Migration moved westward through Fort Pitt as settlers trekked from eastern Pennsylvania and New England west to new lands and opportunities. The river-canal system which opened in 1834 between Philadelphia and Pittsburgh reduced traffic on Pennsylvania's turnpike. Heavy freight traffic diverted to the canals although stagecoach lines continued to prosper.

[Return to List of Roads and Trails](#)

THE SANTA FE TRAIL

This trail from Missouri to Santa Fe was the oldest and the first over which wagons were used in the westward expansion beyond the Mississippi River. It was primarily a commercial route, carrying a stream of merchants' wagons until it was replaced by the coming of the railroad in 1880. In 1821 a mule pack train had left from Franklin, Missouri, to travel to Santa Fe on what is later known as the Mountain Route. The next year's expedition avoided the mountains, leaving the Arkansas River and heading across the arid plains for the Cimarron River; this route became known as the Cimarron cutoff. During the early years of commerce, much of the route was within Mexican territory. Not until 1848 when the Mexican War ended was the entire trail officially within American territory.

[Return to List of Roads and Trails](#)

THE UPPER ROAD

The Upper Road branched off from the King's Highway at Fredericksburg, Virginia, and went southwest through Hillsboro, Salisbury, and Charlotte in North Carolina, then on to Spartanburg and Greenville in South Carolina. The road generally followed the old Occaneechee Path which went from Bermuda

10 UPPER ROAD

Hundred on the James River, and Old Fort Henry (now Petersburg) southwest to the Indian trading town of the Occaneechi which existed by 1675 on an island in the Roanoke River at about the location of today's Clarksville, Virginia, close to the present Virginia and North Carolina state line. From that location the trading trail went both north and south. The Trading Path divided at the Trading Ford of the Yadkin River, one branch turning toward Charlotte, the other through Salisbury to Island Ford on the Catawba, to the north of present Lake Norman. DeSoto and his cavaliers were perhaps the first white men to use portions of the great Occaneechi Path (1540). Some of the people associated with Fort Henry were Col. Abraham Wood, Thomas Batts, Robert Fallam, James Needham, Gabriel Arthur, and John Lederer. From 1700-1750, active trading was carried on by white emigrants with Indian villages. After 1740, the proprietary governor of the Granville District began to issue grants to Quakers and others from the tidewater counties of North Carolina and Virginia, attracting them into the northern half of North Carolina. By 1750, the Upper Road became an important wagon route for southbound migrations into that portion of North Carolina. During the Revolutionary War, the road was used extensively for troop movements in the South--relating to the battles at Guilford Courthouse, King's Mountain, and Cowpens.

[Return to List of Roads and Trails](#)

THE WILDERNESS ROAD

The road through the Cumberland Gap was not officially named "the Wilderness Road" until 1796 when it was widened enough to allow Conestoga Wagons to travel on it. However, by the time Kentucky had become a state (1792), estimates are that 70,000 settlers had poured into the area through the Cumberland Gap, following this route. The Cumberland Gap was first called Cave Gap by the man who discovered it in 1750--Dr. Thomas Walker. Daniel Boone, whose name is always associated with the Gap, reached it in 1769, passing through it into the Blue Grass region, a hunting ground of Indian tribes. He returned in 1775 with about 30 woodsmen with rifles and axes to mark out a road through the Cumberland Gap, hired for the job by the Transylvania Company. Boone's men completed the blazing of this first trail through the Cumberland Mountains that same year, and established Boonesborough on the Kentucky River. The Wilderness Road connected to the Great Valley Road which came through the Shenandoah Valley from Pennsylvania. Some suggest the origin of the Wilderness Road was at Fort Chiswell (Ft. Chissel) on the Great Valley Road where roads converged from Philadelphia and Richmond. Others claimed the beginning of the road to be at Sapling Grove (today's Bristol, VA) which lay at the extreme southern end of the Great Valley Road since it was at that point that the road narrowed, forcing travelers to abandon their wagons.

Let me call your attention to an interesting set of web pages about the Wilderness Road and the Cumberland Gap. <http://www.wilderness-road.com>

It's the work of Tom N. Shattuck, an engineer who knows a lot about the Road, the Gap, and the new tunnel located there.

[Return to List of Roads and Trails](#)

ZANE'S TRACE

In 1796 Colonel Ebenezer Zane petitioned Congress to authorize him to build a road from Wheeling to Limestone (Maysville). Congress awarded him a contract to complete a path between Wheeling and Limestone by January 1, 1797. The contract required him to operate ferries across three rivers as soon as the path opened. His only compensation was to be three 640-acre tracts, one at each river crossing, to be surveyed at his own expense. Zane rounded up equipment and a crew of workmen; with axes, they cut trees and blazed a trail. At first, Zane's Trace was merely a narrow dark path through the forest, between a wall of ancient trees. Only horsemen could travel over it. For many years, it was not wide enough for

1. The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that proper record-keeping is essential for the integrity of the financial system and for the ability to detect and prevent fraud. The text also mentions the need for regular audits and the role of internal controls in ensuring the reliability of the data.

2. The second part of the document focuses on the challenges faced by organizations in implementing effective risk management strategies. It highlights the complexity of identifying and assessing risks, particularly in a rapidly changing environment. The text suggests that organizations should adopt a proactive approach to risk management, involving all levels of the organization and utilizing a variety of tools and techniques.

3. The third part of the document discusses the importance of transparency and accountability in the financial system. It argues that transparency is essential for building trust and for the effective functioning of the market. The text also mentions the need for strong governance structures and for the establishment of clear lines of responsibility and accountability.

wagons. In 1804 the Legislature appropriated about fifteen dollars a mile to make a new twenty-foot road over Zane's route. But by modern standards, it was still a poor road because they left tree stumps whenever they were under one foot high. The Trace was used by hundreds of flatboatmen returning on foot or horseback to Pittsburgh and upriver towns from downriver ports as far away as New Orleans. The road also became the mail route from Wheeling to Maysville, and eventually it went on to Lexington and Nashville.

I'm pleased to share the following letter, introducing us to an expanded list of resources:
Source: R. Lee Hadden, Reference Librarian, US Geological Survey Library

1. The first part of the document discusses the importance of maintaining accurate records of all transactions and activities. It emphasizes the need for transparency and accountability in financial reporting.

2. The second part of the document outlines the various methods and techniques used to collect and analyze data. It includes a detailed description of the experimental procedures and the statistical analysis performed.

3. The third part of the document presents the results of the study. It includes a series of tables and graphs that illustrate the findings of the research. The data shows a clear trend in the relationship between the variables studied.

4. The fourth part of the document discusses the implications of the findings. It highlights the potential applications of the research in various fields and the need for further investigation in this area.

5. The fifth part of the document provides a conclusion and a summary of the key points. It reiterates the importance of the research and the need for continued efforts in this field.

6. The sixth part of the document includes a list of references and a bibliography. It cites the works of other researchers in the field and provides a comprehensive overview of the current state of knowledge.

7. The seventh part of the document contains a list of appendices and supplementary materials. These include additional data, figures, and tables that support the main text of the document.

8. The eighth part of the document provides a list of acknowledgments and a thank you note. It expresses gratitude to the individuals and organizations that provided support and assistance during the course of the research.

9. The ninth part of the document includes a list of contact information and a disclaimer. It provides details about the author and the organization, and includes a statement regarding the use of the research findings.

THE HISTORY OF THE CITY OF BOSTON

FROM THE FIRST SETTLEMENT
TO THE PRESENT TIME
BY
JOHN H. COLEMAN

VOLUME I

THE
FIFTH EDITION

NEW YORK
1888

Glossary

By Dave & Sue Tylcoat

A glossary of unusual words found in wills etc. followed by what we understand to be the meaning. The number following the meaning is the ID# of the person on whose notes the word appears, where applicable.

(Some are very obscure and disused which made the task of transcribing them from 16th & 17th century English handwriting quite difficult!)

Almeric. See OED Almere & Ambry - probably a corruption of Almry or Ambry Close, Westminster, - was originally Almonry Close. 737.

Ambry. (See also almeric). Large cupboard. 737.

Appurtenances. The rights and duties attached to the holding of manorial land. The most important were submission to the manor court, grazing rights and the payment of various fines to the lord of the manor. A pew, or part of a pew, in church was often an 'appurtenance' of a specific house in the parish. (Dict. Gen., Fitzhugh). 408.

Armiger. An armiger is someone entitled to bear heraldic arms. 434. 610.

Backsyde. Back yard, outbuildings etc. attached to a dwelling. 404.

Bailiff. (a) The manorial lord's representative and estate manager, but subordinate to the steward. (b) In Colchester, at least, the name of the town's two leading citizens until 1635. (Local Hist. Enc., John Richardson) 409.

Bays & Says. A type of woolcloth made around Colchester with wool from Leicester - see 790.

Baymaker. See Bays & Says. See 709. See also App IX. 420. 431. 790.

1888-89

of a number of words found in the 1888-89
year. The number following the word is the 1888-89
year. The word space is given in the following.

very common words which made it difficult to find
the word. But the following is the word.

Behoofe. Use, benefit, advantage. 404.

Bishops Transcript. (BT) A copy of one year's entries in a Parish register, sent by the incumbent to his bishop, usually at Easter. Sometimes the actual register has not survived but the BT has. 356. 529. 672. 693.

Calendar. In 1752 the year start was moved from March 25th to preceding January 1st. Transcribing pre-1752 copy '5 Feb 1626' as '5 Feb 1626/7'. September sometimes written 7ber, October - 8ber etc - not to be confused with present month numbers. 522.

Chaffing dish. Chaffer. Small enclosed brazier containing hot coals, usually charcoal, for heating food and drink. 700.

Chandler. Candle maker. Candles were often made from tallow. 541.

Chapman. A dealer in small items e.g. haberdasher. Sometimes travelling. Unh 1638.

Clerk of the Market. From 1640 his power was restricted to the Verge (within 12 miles of the residence of the Court). On market days the Clerk attended from 10am to sunset, and trading commenced and ceased on his announcement. 623.

Codicil. An addition to a will to record changes. 469.

Coniger. Conygrye etc. Rabbit Warren. 311. 312.

Cony. Rabbit. Kept in conigers for food. Some were kept in the properties around Nuneaton Abbey where the Tilcote family had a tenement in 1543. See Richard 312. 311.

Copyhold. The tenant was protected by title written on the manor court rolls, of which he was provided with a copy - hence the name of the tenure. When transferring the property the tenant first surrendered it to the lord who held the fee simple, and then the new tenant was admitted on payment of a fine. 670.

Cordwainer. Pronounced 'cordner'. Generally a shoemaker or cobbler. 550.

Cornet. OED: - The fifth commissioned officer in a troop of cavalry, who carried the colours; corresponding to the ensign in infantry. Cornet. Dict.Gen: - The lowest commissioned rank in a cavalry regiment, equivalent to the present 2nd Lieutenant. 1260.

The first part of the document discusses the importance of maintaining accurate records of all transactions and activities. It emphasizes the need for transparency and accountability in financial reporting.

Furthermore, it highlights the role of internal controls in preventing fraud and ensuring the integrity of the financial statements. The document also mentions the importance of regular audits and reviews.

In addition, it discusses the impact of external factors such as market conditions and regulatory changes on the organization's financial performance. It suggests that the organization should remain flexible and adaptable to these changes.

The document also touches upon the importance of communication and collaboration between different departments and stakeholders. It stresses the need for clear and concise reporting and the importance of keeping all parties informed.

Overall, the document provides a comprehensive overview of the financial management process and the various factors that can influence an organization's financial health. It serves as a valuable resource for anyone involved in financial planning and reporting.

The document concludes by reiterating the importance of maintaining high standards of financial integrity and transparency. It encourages the organization to continue to improve its financial management practices and to stay up-to-date with the latest industry trends and regulations.

Finally, it expresses the organization's commitment to providing accurate and reliable financial information to all stakeholders. It promises to continue to work hard to ensure the highest level of financial performance and transparency.

The document is signed off by the Chief Financial Officer, who expresses confidence in the organization's financial future and its ability to overcome any challenges that may arise. It also includes a date and a reference to the relevant financial statements.

The document is then reviewed and approved by the Board of Directors, who endorse the financial management strategy and the commitment to transparency and accountability. It is then distributed to all relevant stakeholders for their information and action.

The document is finally filed in the appropriate location and made available to all authorized personnel. It serves as a key reference point for all financial management activities and is updated regularly to reflect any changes or developments.

Court Leet. The term usually refers to a manorial court although it could also apply to a Hundred court. It dealt with petty offences such as common nuisances or public affray. 432.

Cousin German. First cousin i.e. the child of an uncle or aunt. 458.

Culler. A person who grades animals for killing. Wm. Havens, culler. See Robt 778. 778.

Deforciant. Defendant who deforces another or prevents him from inheriting an estate. 621.

Demesne. Those parts of the land and rights of a manor that the lord retained for himself, as distinct from those used by his tenants. 522.

Demise. To convey by will or lease an estate either 'in Fee' i.e. hereditarily, or for a term. 522. 638.

Deponent. One who makes a statement on oath (verbal or written) in connection with a legal case. Various wills.

Devise. To leave, by will, land as distinct from personal property. 'Bequeath' is used for the latter. Various wills.

Duitsh man. Probably Dutchman (DJT). From Essex RO info on other non-parochial churches - "In the second half of the 16th century, a considerable number of refugees from the Low Countries settled in Colchester where they established their own church". 404.

Feet of Fines. These records contain judgements as to the ownership of land and property, quite often the result of collusive actions brought by parties to establish title in the absence of documents. 528.

Feoffment. Transfer of land from one person to another. 529.

Fleakes. (fleacks, felks) Hurdles, presumably for fence making. 671.

Flock. Wool refuse used for stuffing mattresses and pillows. 408.

1. The first part of the document is a list of the names of the members of the committee who have been appointed to study the problem of the shortage of housing in the city of New York.

2. The second part of the document is a list of the names of the members of the committee who have been appointed to study the problem of the shortage of housing in the city of New York.

3. The third part of the document is a list of the names of the members of the committee who have been appointed to study the problem of the shortage of housing in the city of New York.

4. The fourth part of the document is a list of the names of the members of the committee who have been appointed to study the problem of the shortage of housing in the city of New York.

5. The fifth part of the document is a list of the names of the members of the committee who have been appointed to study the problem of the shortage of housing in the city of New York.

6. The sixth part of the document is a list of the names of the members of the committee who have been appointed to study the problem of the shortage of housing in the city of New York.

7. The seventh part of the document is a list of the names of the members of the committee who have been appointed to study the problem of the shortage of housing in the city of New York.

8. The eighth part of the document is a list of the names of the members of the committee who have been appointed to study the problem of the shortage of housing in the city of New York.

9. The ninth part of the document is a list of the names of the members of the committee who have been appointed to study the problem of the shortage of housing in the city of New York.

10. The tenth part of the document is a list of the names of the members of the committee who have been appointed to study the problem of the shortage of housing in the city of New York.

11. The eleventh part of the document is a list of the names of the members of the committee who have been appointed to study the problem of the shortage of housing in the city of New York.

12. The twelfth part of the document is a list of the names of the members of the committee who have been appointed to study the problem of the shortage of housing in the city of New York.

13. The thirteenth part of the document is a list of the names of the members of the committee who have been appointed to study the problem of the shortage of housing in the city of New York.

Freemen. There are three meanings to this word: a man who was free of trade taxes and who shared in the profits of the borough in which he lived and traded, a tenant who was free of feudal service and a man who had served his apprenticeship and who could then work at his trade in his own right. In the city of London nearly all freemen became so by virtue of being freemen of a City Guild. On attaining company freedom, a man would automatically apply for the freedom of the City. He was entitled to call himself 'Citizen' and, (for example), 'Tallow Chandler'. (Dict Gen Fitzhugh). 574. 578.

Gaol Delivery. A judicial hearing of the charges against all prisoners awaiting trial in the area prisons. By a Commission of Gaol Delivery, the king appointed certain persons justices and empowered them to deliver his gaols at certain places of the prisoners held within them. This commission was first issued to Justices in Eyre, but later to Justices of Assize and of Gaol Delivery. It ordered them to meet at a certain place and at a time which they themselves could appoint, when the sheriff of the county would bring all the prisoners of the area before them. 409.

Garnish. A set of vessels for table use, especially of pewter. Garnish of pewter - complete set of twelve each of platters, dishes, saucers, cups and small flat plates. Often displayed on the cupboard head. 404.

Gearing. Harness for horses, presumably to pull the wagons, harrows & plough. 443.

Gredyron. A gridiron, a platform of iron bars, with short feet and a long handle, for cooking meat over a fire. 700.

Haberdasher. A dealer in, or maker of hats and caps. Later a dealer in thread, ribbons and other small wares. 58.

Hatchment. Funeral board with Arms painted on. 620.

Hearth Tax. Tax on fireplaces, from 1662, abolished 1689. 528. 534. 683.

Hereditament. Property which may be inherited. Various wills.

Hovel. Open shed; outhouse for cattle, storing grain, tools etc. 669.

Husbandman. Usually a smallholder who may also have to work on others land to support himself, i.e. one below the status of yeoman. 736.

1. The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that proper record-keeping is essential for the integrity of the financial system and for the ability to detect and prevent fraud.

2. The second part of the document outlines the specific procedures for recording transactions. It details the steps involved in the accounting cycle, from identifying the transaction to posting it to the appropriate ledger account.

3. The third part of the document discusses the importance of internal controls. It explains how internal controls are designed to prevent errors and fraud, and how they can be used to ensure the accuracy of the financial statements.

4. The fourth part of the document discusses the importance of the audit trail. It explains how the audit trail is used to trace transactions from their source to their final destination, and how it can be used to identify and correct errors.

5. The fifth part of the document discusses the importance of the closing process. It explains how the closing process is used to prepare the financial statements for the end of the accounting period, and how it can be used to ensure the accuracy of the financial statements.

Husslements. (Hustylment, hushelles, husoulment, householdments) Minor household goods of little value; odds and ends. 671.

Jacobi. James I. 408.

Journeyman. A qualified tradesman working for someone else. 129. 146.

Joyned. (E.g. 'joyned stoole' & other furniture). Made by a joiner. 408.

Kettle. An open cooking pot or pan with semi-circular handles fixed to both sides, not the modern type. 700.

Lay Subsidy. A tax on movable property. 671.

Meet. Suitable, fit, proper. 404.

Messuage. A dwelling house with the ground around it and any outbuildings. 683. 523.

Moiety. A half. 529.

Moot Hall. Hallmoot. Another name for a manor court, Dict. Gen. Fitzhugh 409.

Naked. See Wool. A note made in a burial register when the corpse was unshrouded and the coffin unlined. This was sometimes the case with a poor family who could not afford the expense of a woollen shroud, or the payment of a fine for using any other type of cloth. Dict. Gen., Fitzhugh. 790.

Pale. A stake for fence making. 404.

Perambulation of the Bounds. The Vestry had the responsibility of walking the bounds of the parish at Rogationtide - the three days before Ascension Day. The Incumbent, parish officers, prominent vestrymen and a good many schoolchildren employed for the occasion, armed with the authority of a wand of office, checked that boundary stones were in position and that no buildings encroached, unrated, on parish territory. 620.

Pillow beers. (Also pillow coddys & pillow drawers) - Pillow cases. 408.

Porringer. Bowl for soup or porridge. 631.

Quicksett. Hedge. 404.

Quissions. Cushions. 672.

Shoppes. House or building where goods are made or prepared for sale and sold (workshop - DJT). 404.

Skomar. Skimmer; either of iron for taking the ashes from the hearth, or of other metal for use as a cooking ladle. 700.

Sollars. Upper room in house etc. e.g. attic. 404.

Spytt. A spit. For roasting meat over a fire. 700.

Stirk. Usually between one & two years old, also sterke & styrke (applying to a heifer). 443.

Surveyor of the Highways. (Overseer of the Highways, Boonmaster, Stonewarden, Waywarden etc.). A parish officer established by the Highways Act 1555. He was unpaid and appointed from among the parishioners. Obligated to survey the highways three times a year and organise the statute labour that was provided by landholders to repair the roads, or else collect the money commutations. 534.

Tainters. Wooden framework on which cloth was stretched after milling, so that it would dry evenly and without shrinking. 404.

Tallow Chandler. A person dealing in Tallow, possibly a Candle maker, using animal fat. 541.

Tenement. A holding of land and buildings. 311.

Tithingman. Tithing. A group of men or boys held responsible to the manor court for its members' good conduct. The elected representative of the tithing was the Tithingman. 312.

Trade Tokens. Tokens issued by traders in times of coin shortage, usually brass or

copper. 541.

Trammel. A series of rings or links, or other device, to bear a crook at different heights over a fire; the whole being suspended from a transverse bar (the crook tree), built in the chimney. 700.

Treen Ware. Wooden ware - made from trees. 672.

Trevytt. A trivet. 700.

Virginalls. (pair of) Keyed musical instrument, popular in the sixteenth and seventeenth centuries, similar to a spinet but without legs, played on a table. 631.

Visitation. Heralds visitations took place from 1530 onwards to check on peoples claims to bear arms. Ecclesiastical visitations by archdeacons or bishops checking on the conduct etc of their parishioners. (H) 437. 442. 926. (E) 413. 612. etc.

Water bailiff. An officer in seaport towns who was empowered to search ships for contraband etc. 698.

Waynscotte. Wooden panelling used to line the walls of a room. The word also used for panelled chests, chairs etc. 408.

Wool. Burying in Woollen Act, passed in 1660 and reinforced in 1678, to support the woollen trade by making it an offence to wrap corpses or line coffins in any material other than wool. The only bodies exempt were those of people who had died of plague. 790. 420. 431.

Woolstapler. A merchant who buys wool from the producer, grades it, and sells it to the manufacturer. 621.

Yeoman. Farmers who would work on their own land as either freeholders or tenants. Husbandmen would tend to have less land. 269. 466. 574. 671. 680.

Any comments or observations would be appreciated: [e-mail](#)

1. The first part of the document discusses the importance of maintaining accurate records of all transactions and activities. It emphasizes the need for transparency and accountability in financial reporting.

2. The second part of the document outlines the various methods and techniques used to collect and analyze data. It includes a detailed description of the experimental procedures and the statistical analysis performed.

3. The third part of the document presents the results of the study. It includes a series of tables and graphs that illustrate the findings of the research.

4. The fourth part of the document discusses the implications of the findings and the potential applications of the research. It also includes a section on the limitations of the study and suggestions for future research.

5. The fifth part of the document provides a summary of the key findings and conclusions. It also includes a list of references and a list of figures and tables.

6. The sixth part of the document contains a list of appendices, which include additional data and information that is not included in the main body of the document.

7. The seventh part of the document is a list of references, which includes a list of books, articles, and other sources that were consulted during the research.

8. The eighth part of the document is a list of figures and tables, which includes a list of all the figures and tables that are included in the document.

9. The ninth part of the document is a list of appendices, which includes additional data and information that is not included in the main body of the document.

10. The tenth part of the document is a list of references, which includes a list of books, articles, and other sources that were consulted during the research.

GRAVEN IMAGES

The following list was compiled from several different sources. I welcome additions.

These are a few of many motifs found on gravestones with some of the commonly held interpretations of their symbolism.

Don't forget to visit [Grave Symbols](#) - my list of various initials for lodges and organizations, often found on gravestones.

- **Angel, Flying-** Rebirth; Resurrection.
- **Angel, Trumpeting-** Resurrection.
- **Angel, Weeping-** Grief and Mourning.
- **Arch** - Victory in death.
- **Arrow-** Mortality.
- **Bird-** Eternal life.
- **Bird, Flying-** Resurrection.
- **Book-**Representation of a holy book: i.e. the Bible.
- **A pair of Holy Books** on Mormom (LDS) headstones indicates the Bible and Book of Mormon
- **Three Holy Books** on Mormom headstones indicates the Bible, Book of Mormon, and Doctrine & Covenants -- all of which are scripture to the LDS Church.
- **Breasts** (Gourds, Pomegranates) - Nourishment of the soul; the church.
- **Columns and Doors-** Heavenly entrance.
- **Crown-** Glory of life after death.
- **Cup or Chalice-** The Sacraments.
- **Dove-** Purity; Devotion.
- **Dove, Flying-** Resurrection.
- **Drapes-** Mourning; Mortality.
- **Flame or Light-** Life; Resurrection.
- **Flower-** Fragility of life.
- **Flower, Severed Stem-** Shortened life.
- **Garland or Wreath-** Victory in death.
- **Grim Reaper-** Death personified.
- **Hand, Pointing Up-** Pathway to heaven; Heavenly reward.
- **Hands, Clapsed-** The goodbyes said at death.
- **Heart-** Love; Love of God; Abode of the soul; Mortality.
- **Hourglass-** Passing of time.
- **Hourglass, Flying-** Time flies.
- **Lamb-** Innocence.

The purpose of this study is to investigate the effects of the proposed system on the performance of the system.

The results of the study show that the proposed system has a significant positive effect on the performance of the system.

The study also shows that the proposed system has a significant positive effect on the performance of the system.

In the will of Thomas Taylcote of Nailston afforesayde

my bodye to be buryed in the sepulcher "in the pishe church of Nelston afforesayde"
[Will of Thomas Taylcote, Nailstone, Leicestershire, 1612]

These are just a few examples showing different styles. If you want to know more there are plenty of books on this subject. One inexpensive booklet we have found very useful is '**A Secretary Hand ABC Book**' by Alf Ison, Berkshire Books, ISBN 1 871941-08-3. It is very easy to use and gives many variations of the same letters, included also are some worked examples of documents from the same period as above. Two other booklets you may find useful are: 1) '**A Glossary of Household, Farming and Trade Terms from Probate Inventories**', Rosemary Milward, Derbyshire Record Society, ISBN 0 9505940 1 6. 2) '**A Latin Glossary for Family and Local Historians**', Janet Morris, FFHS, ISBN 0 907099 89 0. See also the [Glossary](#) here on this web site.

[Click](#) for a **copy and full transcription** of the will of Jonathan Tayllcoate of Saddington, Leicestershire, Tallow Chandler (candle maker), 1731.

Jonathan Tayllcoate

Clicking on one of the following numbers will take you to a full transcription of the document containing the corresponding numbered extract above. These will show you some of the terms used during the period and may help with transcription of your own wills etc.

[1](#) [2](#) [4](#) [5](#) [6](#) [7](#)

Who were these people?

1. William (c1500 - c1547). Very likely to be 11x G Grandfather of David John Tylcoat. Evidently a farmer living in Nailstone, Leicestershire. The family appears to have come from 'across the border' in nearby Warwickshire. This line includes the present day **TYLCOAT** spelling. ID#401

2. Henry (c1500 - c1551). Living in Colchester in later years and possibly a pewterer. Wife Ellen. Probably of the same family as William (1.) but a section of the family that moved to Essex. We have found links between the type of cloth made around Colchester and the breed of sheep farmed in Leicestershire. ID#402

[Go to Home Page](#)

3. Humphrey (c1563/4 - Oct 1626). Appears to have moved from Nailstone to Manchester, where he was a preacher. Wife Alice. Buried in Manchester Cathedral. His Probate Inventory, written 1st March 1626[7], is held at Lancashire Record Office ref: WCW 1627 TAYLECOATE, Humphrey. ID#672

4. William (c1530 - c1578). Son of Henry (2.), two daughters, Anne and Helen. Of St. Mary's, Colchester. Sole executor to his will was John (6.). ID#700

5. John (1562 - 1604). Pewterer & Brazier living in Colchester, son of John (6.) and father of John who emigrated to America. Wife Anne Skinner. This line includes the present day **TALCOTT** spelling. ID#408

6. John (c1535 - 1606). Out-lived his son (5.). Pewterer in Colchester, probably the one to receive the original Grant of Arms [see picture of the **Talcott Arms**, 1632, (.jpg 118KB) and **accompanying notes**]. This line includes the present day **TYLECOTE** spelling. It is unclear whether he was born in Essex or Warwickshire. Married 1. Alice Wells 2. Marie (or Mary) Pullen. ID#404

7. Thomas (c1570 - c1612). Probably a farmer, in Nailstone. Wife Sarah. His will makes interesting reading and from the handwriting of his signature and that of the will it appears it was all his own work. From it we see that he wished his sons to be as well educated as himself - "**I will that William And John my sonnes bee kept to scoolles [?that they (....) of my (....)] can write & reede in befitting manner**". ID#918

»» If you are interested in any of this family then see the notes on the **GEDCOM** we have produced.

Tips for getting started: First photocopy the photocopy you got from the Record Office - this will become your 'working copy'. Put the other one away. Rule under all the lines in pencil and number them in the margin. On a pad of lined paper number every other line (giving you effectively 'double spacing' and room to write corrections etc.). Go through the copied document line by line picking out words you can easily positively identify and write them on the corresponding lines on your lined paper - in the same place they appear in the copied document. By now you have probably got a whole alphabet and may even be lucky enough to have some complete sentences. The rest isn't always easy - but at least you have a starting point! Most wills of that period start with something like: "In the name of God Amen the 10th day of June in the year of our Lord 1604 [then often the King's name - king of England Scotland France Ireland etc.] I Joe Bloggs of Loose Chippings in the County of Essex, bricklayer, etc. etc." Now you have more letters and words. Visit Hay-on-Wye and buy yourself the full version of the Oxford English Dictionary (the Compact Edition goes for about £20 second hand). Read it.

Note: The same word (or person's name) may be spelt various ways within the same document! For an indication of **spelling variations** take a look at the 93 we have so far found for **Tylcoat / Tylecote / Talcott**.

Good luck!

[Then you can get as annoyed as we do when you see people copying your work

1. The first part of the document discusses the importance of maintaining accurate records of all transactions.

2. It then goes on to describe the various methods used to collect and analyze data from different sources.

3. The next section details the results of the analysis, showing a clear trend of increasing activity over time.

4. Finally, the document concludes with a summary of the findings and a recommendation for further research.

5. The appendix contains a list of references and a detailed description of the data sources used in the study.

6. The following table provides a summary of the key data points collected during the study.

7. The data shows a significant increase in the number of transactions recorded over the period of the study.

8. This increase is likely due to a combination of factors, including improved data collection methods and a higher volume of activity.

9. The results of the analysis suggest that the system is capable of handling a large volume of transactions efficiently.

10. In conclusion, the study has demonstrated the effectiveness of the proposed system in maintaining accurate records of transactions.

- without so much as a citation, let alone a thank you!]

Handling the originals of one or two of the documents above, written on parchment or vellum, and up to 450 years old, was a real privilege. If you have anything like them at home they really ought to be given (or permanently loaned) to a County Record Office - where they will be kept in a humidity & temperature controlled environment so that others may benefit from seeing them in the future. A special thank you to the staff for their assistance at the C.R.O.s of Essex, Leicestershire, Warwickshire and Lancashire.
